How to Configure Soft Phone on Android Device.

To configure a soft phone. You should have a sip account. The sip account will provide you 3 parameters you will need to set up a soft Phone on your android device. Signup for free at [www.vezeti.net](http://www.vezeti.net) , login and get your sip account parameters. These parameters are Sip Account USERNAME, PASSWORD & SIP SERVER URL

# 1

Go Play store, download and install the GS Wave App. Allow all permissions to allow app work well

# 2

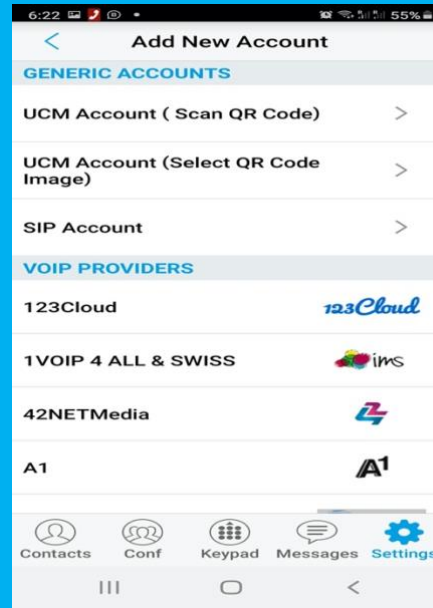

Click on Settings and then click "Accounts Settings"

# 3

Click the "+" Sign at the top right corner to add a sip Account

# 4

Click on Sip Account to enter the parameters

# 5

First Click on "Account Name". Enter any name of your choice eg. 9001, Office, Extn then click OK to save

# 6

Click SIP Server and Enter "switch1.vezeti.net or 138.68.136.242 then click OK to save

# 7

Click SIP User ID. Enter the USERNAME of your sip account and click OK to save.

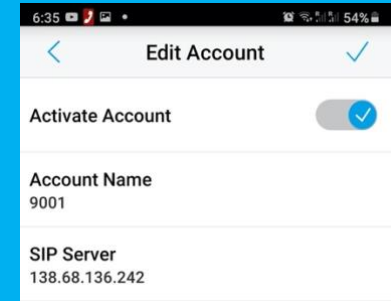

# 8

Click SIP Authentication ID. Enter the same USERNAME entered above and click OK to save

# 9

Click Password. Enter the Password of your SIP account and click OK to save

# 10

After saving the password, click on the check sign ✓ at the top right corner above to save all the settings

When the red light beside your configured sip account turns green like this, it means you have configured the soft phone correctly and the internet is available. If it still remains red, restart the process or check you are connected to the internet
